# What Do We Have to Lose?

This bulletin board was designed for World Water Day 2021 by Jenny and Beth, students in EDUC 423 Arts Methods for Elementary Teachers at Lake Superior State University.

Because distance learning made it impossible for students to construct bulletin boards in person, students were challenged to create interactive bulletin boards for teachers to use in celebration of World Water Day 2021. Please feel free to use this bulletin board idea in your classroom!

WHAT THE FINISHED BOARD SHOULD LOOK LIKE

Use a background of your choice, blue makes sense.

# What Do We Have To Lose?

*Be a Great Lakes Water Steward*

Which fish and animals live in our precious Great Lakes? Pin them to their home!

Bag with cut out fish

Bag with cut out animals

Push pins

# Broad overview of manipulatives

Staple ziplocks or paper pouches to hold manipulatives. The manipulatives should be labeled on the back with either “Great Lakes” or “Tropical” so that students can check their sorting or make a competition of it with classmates.

# Fish of the Great Lakes

Write “Great Lakes” on the backs once they are printed and cut out

Lake Sturgeon

Rainbow Trout

Northern Pike
