

Memorandum of Understanding
Lake Superior State University (LSSU) and
the Lake Superior State University Faculty Association (LSSU-FA)

August 17, 2023

Sections affected:

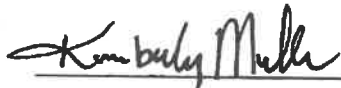

13.1.1

Statement of Problem:

In the agreement, the Curriculum and General Education Committees are composed of one (1) faculty member from each school. With the School of Natural Resources and the Environment being moved from the College of Science and the Environment, there will be one (1) representative from the College of Science and the Environment instead of two (2).

Solution:

For the 2023-2024 Academic Year, the University agrees that the composition of the Curriculum and General Education Committees shall be composed of one (1) elected faculty member from each school with the exception of the College of Science and the Environment, which will have two (2) elected faculty members until the school compositions have been finalized
